Disclosure Information

- The interest charge on the Checking Line of Credit advances begins to accrue on the date an advance is posted to your account and continues to accrue daily on the unpaid principal balance.
- We calculate the interest charge on your account by applying the daily periodic rate to the "daily balance" of your account for each day in the billing cycle. To get the "daily balance" we take the beginning balance of your account each day, add any new advances or fees, and subtract any payments, credits, or unpaid interest charges.
- You may also determine the amount of interest charges by multiplying the "Balance Subject to Interest Rate" by the number of days in the billing cycle and the daily periodic rate. The "Balance Subject to Interest Rate" disclosed in the Interest Charge Calculation table is the "average daily balance." To calculate the "average daily balance" add up all the "daily balances" for the billing cycle and divide the total by the number of days in the billing cycle.
- If there are two or more daily periodic rates imposed during the billing cycle, you may determine the amount of interest charges by multiplying each of the "Balances Subject to Interest Rate" by the number of days the applicable rate was in effect and multiplying each of the results by the applicable daily periodic rate and adding the results together.
